

LINES

GAUDI
ARCHITECTURAL SOLUTIONS

CONTENTS

A newly-designed product of this year is the LINES collection. It is modern, concise, courageous, technical collection — this is how the creators themselves characterize it. It is dominated by the motives of industrialism, the themes of air and aviation. Here, prevail aerodynamic smooth shapes, which seem to move in space, clear, graphic lines and borders that resemble radiator grilles, as well as circles that refer to the chassis.

The collection includes 32 products that can be used on different surfaces and in different combinations due to its multifunctionality and engineering minimalism. The LINES collection was created for those who are tired of the redundancy of the classic and the severity of minimalist interiors; the collection is ideally integrated into the styles of loft, neo-classic, contemporary, industrial, steampunk design.

* Marked products can be used both in the usual way and to create a hidden lighting.

Our innovative technology for indirect lighting products eliminates the need for a foil layer and excludes light penetration at the joints due to the opacity of the material. The exceptional whiteness of products does not distort the color of warm or cold light sources.
