MODERNISTIC

A modern interior is a story told through form, texture, and material. Architectural panels are becoming an essential part of design rather than just decorative elements. The modernistic collection, created by Viktor Dembovskiy, revives the aesthetics of 20th-century brutalism and modernism for contemporary interiors.

Inspired by Modernist Architecture.

The designer reinterprets the legacy of modernism and brutalism, adapting their expressive geometric features for modern spaces. Clean lines and textured surfaces seamlessly fit into minimalist studios, lofts, and contemporary homes.

Aesthetics and Functionality.

Modernistic panels easily combine with stone, wood, metal, and glass, creating intriguing light effects. They enhance the depth of a space, adding character to interiors. Each panel offers various uses and integrates well with modern design concepts.

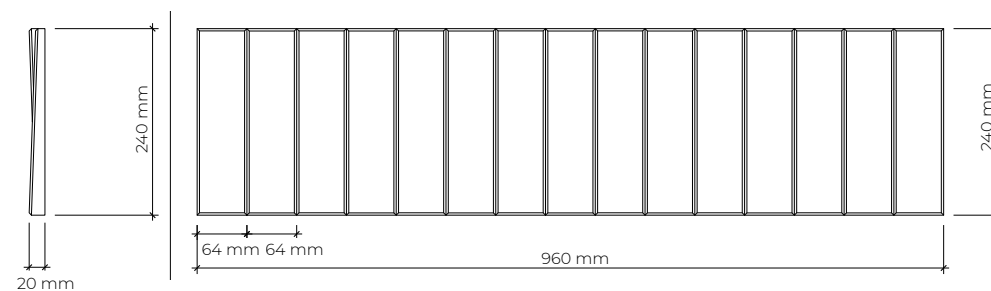

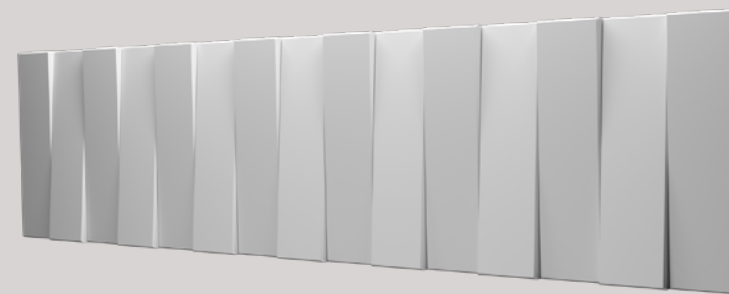

Viktor Dembovskiy believes architectural decor should evolve alongside interior design. The modernistic panels can transform a space, adding expressiveness and dynamism. This collection suits mid-century, brutalism, minimalism, and high-tech styles. It's a tool for those seeking a strong visual impact, looking great in paint or decorative finishes.

Modernistic is the art of form that turns a space into a bold architectural statement.
